

A native of tiny Hampden, MA, Webster grew up listening to a variety of music, from John Mayer and Miley Cyrus to Carrie Underwood, Keane, and the Grateful Dead. Though she's young, Webster is an old soul, and her songwriting reflects a depth and mindfulness that was influenced by hours listening to Josh Turner, Tyler Childers and other acclaimed singer / songwriters. Georgia's social media success brought impressive offers from pop and rock record labels out of New York and Los Angeles, but her instincts told her working out of Nashville would allow her to stay true to herself as a singer/songwriter with small-town roots.
