(New York- February 3, 2017) **Digital Farm Animals** returns today with his brand-new track, [“Digital Love,”](#) featuring pop sensation **Hailee Steinfeld**. **Digital Farm Animals** said of partnering with Hailee on [“Digital Love”](#): *“I’m a big fan of her voice so when she told me that she’d like to sing it, I was super excited! I think Hailee really brings the track to life.”* The Republic Records and Academy Award-nominated actress stormed charts around the world last year with her latest hit single *“Starving,”* which soared to the Top 5 of iTunes Top Pop Songs Chart, has landed Top 10 on Spotify’s US Top 50, is Top 20 on Spotify’s Global Top 50, and has netted over 300 million-plus Spotify streams.

Steinfeld has earned unanimous critical acclaim musically and as an actress, was recognized with two Critics’ Choice Award nominations, and a Golden Globe nomination for “Best Performance by an Actress in a Motion Picture – Musical or Comedy” for her leading role in *The Edge of Seventeen*. Steinfeld’s debut EP, *HAIZ*, is available now.

**“Digital Love”** was written in Copenhagen with James Newman and inspired by a conversation the two of them had about a stint of disastrous relationships and a number of unusual experiences for Newman on mobile dating sites. **Digital Farm Animals** added: *“Being the good friend I am, I decided to make a song out of James’ troubles. “Digital Love” is pretty reflective of a lot of people’s dating lives nowadays. We wanted it to be big and anthemic, and as with all the digital farm animals stuff (I hope), it has a tongue in cheek side to it. We felt that the story was best told as a duet since it’s from the perspective of two people in a relationship and fortunately Hailee Steinfeld wanted to work together.”*

**“Digital Love”** follows Digital Farm Animals’ last year’s single “Millionaire,” a collaboration with electronic trio Cash Cash and featuring Nelly. The song was a smash around the world and scored **Digital Farm Animals** his first A List record on Radio 1 in the UK. Since the release of *Millionaire*, he focused on writing and producing, working with Rita Ora, Diplo, Liam Payne, Fifth Harmony, Black Eyed Peas and JP Cooper, to name a few. He also teamed up with Sigala for “Only One” and wrote and produced Dua Lipa’s “Be The One,” both of which are currently rising up the UK charts. **Digital Farm Animals** will be on tour across Europe later this month supporting Marshmello and The Chainsmokers.
